At Offroad Place in Dallas, TX, we understand how passionately you build your rig, not just for looks, but for performance, safety, and adventure. That's why we are proud to introduce the PowerBrake X-Line Big Brake Kit, the high-performance upgrade your 2nd gen tacoma deserves. Whether you're conquering off-road terrain, carrying heavy gear, or simply cruising Texas backroads, this kit delivers confidence-inducing braking power.

Product Introduction & Purpose

The PowerBrake X-Line Big Brake Kit is a premium brake upgrade engineered for 4×4 vehicles that boost stopping power, reduce fade, and enhance pedal feel. Drawing directly from technology used in Dakar Rally race systems, it’s designed to handle the weight and demands of overlanding, lifted setups, and larger wheels, common additions on a 2nd gen tacoma

Why it's essential for your Tacoma: More gear, more weight, bigger wheels? Your stock brakes may struggle. The X-Line Kit resolves that with race-proven engineering for improved control and safety.

Product Highlights

- **6-piston billet calipers** machined from aerospace-grade aluminum, extremely rigid with minimal unsprung weight **.**
- **High-performance pads**, pre-installed with anti-squeal shims
- **Discs**:
    - *Stage-1:* 1-piece 350 × 34 mm with 48 directional cooling vanes
    - *Stage-2:* 2-piece 345-395 × 34 mm floating discs with 72 cooling vanes
- **Stainless-steel braided lines** with Teflon inner for durability and improved pedal feel
- **MTR (Max Temperature Recording) system** to track peak disc temperatures for maintenance insights
- **Race-derived design**, with every component reflecting off-road racing know-how

Why Choose the PowerBrake X-Line Kit?

1. **Proven Race DNA:** The same technology wins at Dakar and FIA Cross-Country championships, now available for civilian builds
2. **Engineered for Heavy Builds:** Perfect for rigs loaded with roof tents, winches, spare tires, or lifted with aggressive wheel setups. Delivers safe, repeatable braking when you need it most
3. **Performance Beyond OEM:** The kit offers a transformative improvement over stock brakes, outperforming typical pad-and-rotor upgrades
4. **Reliability and Precision:** CNC-machined billet construction, precise tolerances, and engineered cooling components deliver unmatched longevity and consistency

What Comes with the Stage-1 PowerBrake X-Line Kit for Your 2nd Gen Tacoma

Stage-1 Kit includes:

- X-Line 6-piston billet calipers
- Premium pads (pre-loaded)
- 350 × 34 mm 1-piece rotors with 48 vanes
- Billet mounting brackets
- Stainless-steel braided lines
- Hardware + Fitment & bed-in instructions

Stage-2 Kit upgrades:

- 2-piece floating rotors (345-395 × 34 mm) with 72 vanes
- All other components as above

Is the PowerBrake X-Line Kit Right for Your 2nd Gen Tacoma?

If you drive a **2nd gen tacoma** (2005–2015) with any of the following, this kit is for you:

- Lifted suspension with big tires
- Overlanding accessories (roof-top tent, bumpers, storage systems)
- Towing or frequent heavy loads
- Aggressive driving off-road or street
- Seeking better brake modulation, feel, or reduced fade

For **2nd gen tacoma** owners hungry for confidence and control under stress, this is a transformative upgrade.

Key Features & Benefits

1. **6-Piston Billet Calipers:** Precise, strong braking with reduced unsprung weight
2. **High-Performance Pre-Loaded Pads:** Immediate and quiet stopping power
3. **Floating Rotors (Stage-2 Option):** Cooler, more stable performance under heavy use

4. **MTR System:** Helps optimize maintenance and pad/fluid lifespan
5. **Stainless-Steel Brake Lines**: Durable, responsive braking feel over time
6. **Race-Proven Components**: Trusted on the world's toughest off-road events

Who Gains the Most from a Big Brake Upgrade on a 2nd Gen Tacoma?

1. **Overlanders & Adventurers**: Hauling loads, traversing trails, get reliable stopping power.
2. **Lifted Tacoma Owners**: Offset wheels and big rubber? Keep braking sharp.
3. **Truck Campers & Towing Enthusiasts**: Carrying weight means more stopping demand.
4. **Track/Rally Fans**: Experience performance bred from motorsport.
5. **Every Storefront to Backroad Commuters**: Safer braking for daily driving, especially in variable conditions.

What You'll Receive in Your PowerBrake X-Line Kit Package

- X-Line billet 6-piston calipers (red or grey finish options)
- High-performance brake pads (anti-squeal shims, pre-installed)
- Discs (Stage-1: one-piece, Stage-2: two-piece, with cooling vanes)
- Billet mounting brackets with durable threading
- Stainless-steel braided brake lines with Teflon core
- Complete mounting hardware
- Fitment guides and bed-in instructions

Why Offroad Place?

At Offroad Place in Dallas, TX, we share your passion for tough builds that perform. Here's why we stand out:
